-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 28 October 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Specification

1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

Allowable Subject Matter

2. Claims 2,4-8,10,12-16,18, and 19 are allowed over the prior art of record.
3. The following is a statement of reasons for the indication of allowable subject matter:
Please see listed reasons for allowance in the office action dated 9/20/01.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

Art Unit: 2655

5. Claims 1,3,9,11, and 17 are rejected under 35 U.S.C. 102(e) as being anticipated by Kagoshima et al (5890118).

As per claim 1,9, and 17, Kagoshima et al (5890118) teaches a speech synthesis apparatus/program code using pitch marks comprising (col. 3 lines 22-42) first calculation means for calculating a distance between first two pitch marks of a voice portion of speech data to be processed (col. 6 lines 61-67) and second calculation means for calculating a difference between adjacent inter pitch mark distances (col. 7 lines 1-13) and management means for storing the calculation results obtained by said first and second calculation means in a file and managing the results (as storing the adjusted waveforms that contain the pitch information -- col. 11 line 65 to col. 12 line 9)

As per claims 3 and 11, Kagoshima et al (5890118) teaches storage of the pitch marks (m0- mk) with the waveform trains.

Response to Arguments

5. Applicant's arguments filed 10/28/03 have been fully considered but they are not persuasive.

Applicant's argue that the Kagoshima reference teaches interpolation of pitch periods and does not teach calculating a distance between two pitch marks. Examiner disagrees and points to the referenced portions of Kagoshima above, furthermore, examiner points to figure 4 which explicitly shows pitch marks m0-m5. Furthermore, the arguments that Kagoshima fails to

Art Unit: 2655

specify how to calculate the distance between pitch marks, it is noted that the features upon which applicant relies (i.e., how the calculation is performed) are not recited in the rejected claim(s). Applicant is comparing/contrasting the “how” of the calculation, wherein the scope of the claim language states “calculating” (and in fact, the “how” of the calculation, specified in the previously allowed claims, is the reason why these claims have been determined to be allowable) Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).
